

Art.-No.:6.3660.0100

3660

Sanding Control Kit

Characteristics

4CR 3660 is the quickest and most cost effective system for highlighting imperfections such as pinholes and scratches in filler and primer and ensures body work is flat and body styling contours are true prior to final coat application.

Tech Tip

- No masking required
- Easy to apply
- Non-solvent based
- Full coverage to repair area
- No dry time required
- Instant defect detection
- No aerosol / spray-gun required
- No risk of applicator plugging
- Perfect for either wet or dry sanding
- Free applicator with every Sanding Control Kit to ensure continued high quality

Application

Ensure required area is clear from dirt or grease.

Open the Sanding Control Kit container and remove the foam applicator and the separation card.

Holding kit in both hands, insert foam applicator and twist into the powder in a circular motion to ensure even distribution of the 4CR 3660 onto the applicator pad.

Inspect applicator ensuring that the pad has even powder coating. If so, applicator pad is ready to use; if not, repeat above.

Apply powder to the repair area using a smooth circular motion. Check area for imperfections.

Technical Data

Cotent	100 g black powder
