

SUPREME MULTI-CARBON PUTTY - SMC1

v.01-09.2014

Features :

A lightweight, multifunctional putty reinforced with carbon fibers. It has excellent mechanical properties, making it ideal for areas subject to high stress. Its low density makes it suitable for large surfaces. Application in thin or thick layers provides a very smooth finish. It adheres to steel, galvanized steel, aluminum, and polyester surfaces. This filler offers high filling capacity with minimal weight. It is suitable for repairs of all sizes, with even curing and excellent sandability.

Application :

Before application, the surface must be clean, dry, degreased, and sanded. Thoroughly mix the filler with 2 to 3% by weight of BPO hardener. Then apply the mixture within 3 to 5 minutes at 20°C.

Note: Using too much hardener may cause discoloration of the topcoat and deterioration of the product. Do not use at temperatures below 15°C.

Technical data

VOC content: 2004/42/II B(b)(250) < 250 g/l

Color : graphite

Shelf life : 12 months

Density: 1,2 – 1,35 g/cm³

Cleaning

Hardener addition

Putty 100 g

Body filling

BPO hardener 2-3 %

Drying time

20-30 minutes

Hand sanding / dry

P150-P320

Machine sanding / dry

P150-P320

Store in cold place
