

Anti-silicone degreaser - 5L DAS5

v.03-02.2015

Features:

This is a cleaning solvent for bodywork surfaces that will be worked on. This cleaner is ideal for removing tar and grease marks, as well as silicone residue. This product is also ideal for cleaning composite plastics.

Application:

DAS5 Universal Degreaser: Designed for degreasing bodywork surfaces at temperatures between 20° and 25°C.

Notes : Not suitable for thermoplastic surfaces.

Technical data :

Universal degreaser DAS5 :

VOC content : 2004/42/IIIB(a)(850) 750

Shelf life : 24 months

Density : 0,74-0,75 g/cm³

Color: colorless

Application

This degreaser is ready to use.

Use a microfiber cloth and apply the product directly onto the cloth. Clean small areas of approximately 0.5m² of the surface to be treated. Once the product is applied, immediately wipe with a second clean microfiber cloth.

This degreaser should not dry directly on the treated surface.
