

# SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product identifier	: WT 336
Product name	: Permahyd® Hi-TEC Mixing Colour 480 WT 336 Translucent Red
Product type	: Liquid.
Other means of identification	<b>:</b> 4025331462811; 4025331469605; 4025331482178; 4025331490340
Date of issue/ Date of revision	: 28 May 2024
Version	: 2.03
Date of previous issue	: 25 May 2024

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses	: Coating component.
Uses advised against	: Not for sale to or use by consumers.

#### 1.3 Details of the supplier of the safety data sheet

Axalta Coating Systems Gerr	many GmbH & Co. KG
Christbusch 25	
DE 42285 Wuppertal	
+49 (0)202 529-0	
e-mail address of person responsible for this SDS	: sds-competence@axalta.com

#### 1.4 Emergency telephone number

<u>Supplier</u>	
Telephone number	: +(44)-870-8200418
Hours of operation	:

# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

#### **Classification according to UK CLP/GHS**

Not classified.

Date of issue/Date of revision

The product is not classified as hazardous according to UK CLP Regulation SI 2019/720 as amended. See Section 11 for more detailed information on health effects and symptoms.

: 5/28/2024

2.2 Label elements		
Signal word	: No signal word.	
Hazard statements	: No known significant effects or critical hazards.	
Precautionary statements		
Prevention	: Not applicable.	

Date of previous issue

: 5/25/2024

Version : 2.03

1/12

# **SECTION 2: Hazards identification**

Response	: Not applicable.
Storage	: Not applicable.
Disposal	: Not applicable.
Supplemental label elements	: EUH208 - Contains 1,2-benzisothiazol-3(2H)-one. May produce an allergic reaction. EUH210 - Safety data sheet available on request.
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.
2.3 Other hazards	
Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	: This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
Other hazards which do not result in classification	: None known.

# **SECTION 3: Composition/information on ingredients**

3.2 Mixtures : Mixture				
Product/ingredient name	Identifiers	%	Classification	Туре
1,2-benzisothiazol-3(2H)-one	REACH #: 01-2120761540-60 EC: 220-120-9 CAS: 2634-33-5 Index: 613-088-00-6	<0.05	Acute Tox. 4, H302 Acute Tox. 2, H330 Skin Irrit. 2, H315 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Acute 1, H400 (M=10) Aquatic Chronic 2, H411	[1]
			See Section 16 for the full text of the H statements declared above.	

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

[1] Substance classified with a physical, health or environmental hazard

Occupational exposure limits, if available, are listed in Section 8.

#### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

Eye contact	<ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.</li> </ul>
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

Notes to physician       : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.         Specific treatments       : No specific treatment.         SECTION 5: Firefighting measures       5.1 Extinguishing media         Suitable extinguishing media       : Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.         Unsuitable extinguishing media       : Do not use water jet.         5.2 Special hazards arising from the substance or mixture       : Do not use water jet.         Hazards from the substance or mixture       : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazardous combustion products       : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.         5.3 Advice for firefighters       : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.         Special protective actions for fire-fighters       : Appropriate breathing apparatus may be required.	Ingestion       : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms
person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.         Protection of first-aiders       : No action shall be taken involving any personal risk or without suitable training.         4.2 Most important symptoms and effects, both acute and delayed       Over-exposure signs/symptoms         Eye contact       : No specific data.         Inhalation       : No specific data.         Skin contact       : No specific data.         A.3 Indication of any immediate medical attention and special treatment needed         Notes to physician       : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.         Specific treatments       : No specific treatment.         SECTION 5: Firefighting measures       5.1 Extinguishing media         Suitable extinguishing       : Do not use water jet.         media       : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazards from the substance or mixture       : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.         5.3 Advice for firefighters       : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.         Special protective actions       : Cool closed container	person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms
4.2 Most important symptoms and effects, both acute and delayed         Over-exposure signs/symptoms         Eye contact       : No specific data.         Inhalation       : No specific data.         Skin contact       : No specific data.         Ingestion       : No specific data.         A.3 Indication of any immediate medical attention and special treatment needed         Notes to physician       : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.         Specific treatments       : No specific treatment.         SECTION 5: Firefighting measures       5.1 Extinguishing media         Suitable extinguishing media       : Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.         media       : Do not use water jet.         Hazards from the substance or mixture       : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazards from the substance or mixture       : Pire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazardous combustion products       : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.         5.3 Advice for firefighters       : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.	
Over-exposure signs/symptoms         Eye contact       : No specific data.         Inhalation       : No specific data.         Skin contact       : No specific data.         Ingestion       : No specific data.         4.3 Indication of any immediate medical attention and special treatment needed         Notes to physician       : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.         Specific treatments       : No specific treatment.         SECTION 5: Firefighting measures       :         5.1 Extinguishing media       : Recommended: alcohol-resistant foam, CO2, powders, water spray.         media       : Do not use water jet.         for any improve dense black smoke. Exposure to decomposition products may cause a health hazard.         subtance or mixture       : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazardos combustion products       : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.         5.3 Advice for firefighters       : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.         Special protective extrems       : Appropriate breathing apparatus may be required.	<b>Protection of first-aiders</b> : No action shall be taken involving any personal risk or without suitable training.
Eye contact       : No specific data.         Inhalation       : No specific data.         Skin contact       : No specific data.         Ingestion       : No specific data.         4.3 Indication of any immediate medical attention and special treatment needed         Notes to physician       : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.         Specific treatments       : No specific treatment.         SECTION 5: Firefighting measures       5.1 Extinguishing media         Suitable extinguishing media       : Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.         media       : Do not use water jet.         Media       : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazards from the substance or mixture       : Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.         Hazardous combustion products       : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.         5.3 Advice for firefighters       : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.         Special protective actions       : Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses. <td< td=""><td>4.2 Most important symptoms and effects, both acute and delayed</td></td<>	4.2 Most important symptoms and effects, both acute and delayed
Inhalation       : No specific data.         Skin contact       : No specific data.         Ingestion       : No specific data.         4.3 Indication of any immediate medical attention and special treatment needed         Notes to physician       : In case of inhalation of decomposition products in a fire, symptoms may be delayed. SECTION 6: Accidental release measures	
	SECTION 6: Accidental release measures

6.1 Personal precautions, pro	Jue	cuve equipment and emergency procedures
For non-emergency personnel	:	Exclude sources of ignition and ventilate the area. Avoid breathing vapour or mist. Refer to protective measures listed in sections 7 and 8.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.

#### 6.3 Methods and material for containment and cleaning up

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents.

Date of issue/Date of revision : 5/28/2024	Date of previous issue	: 5/25/2024	Version : 2.03	3/12
--	------------------------	-------------	----------------	------

# SECTION 6: Accidental release measures

6.4 Reference to other sections	<ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>
---------------------------------	---

# SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Due to the organic solvents content of the mixture:

Prevent the creation of flammable or explosive concentrations of vapours in air and avoid vapour concentrations higher than the occupational exposure limits.

In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard.

Keep away from heat, sparks and flame. No sparking tools should be used.

Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.

Put on appropriate personal protective equipment (see Section 8).

Never use pressure to empty. Container is not a pressure vessel.

Always keep in containers made from the same material as the original one.

Comply with the health and safety at work laws.

Do not allow to enter drains or watercourses.

#### Information on fire and explosion protection

Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

#### Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

#### Additional information on storage conditions

Observe label precautions. Store between the following temperatures: 5 to 35°C (41 to 95°F). Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight.

Keep container tightly closed.

Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

7.3 Specific	end	use(s)
--------------	-----	--------

Recommendations	: Not available.
Industrial sector specific solutions	: Not available.

# SECTION 8: Exposure controls/personal protection

#### 8.1 Control parameters

#### Occupational exposure limits

No exposure limit value known.

#### **Biological exposure indices**

No exposure indices known.

**Recommended monitoring procedures**: Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### DNELs/DMELs

# **SECTION 8: Exposure controls/personal protection**

Product/ingredient name	Туре	Exposure	Value	Population	Effects
1,2-benzisothiazol-3(2H)-one	DNEL	Long term Inhalation	6.81 mg/m <sup>3</sup>	Workers	Systemic
	DNEL	Long term Dermal	0.966 mg/ kg bw/day	Workers	Systemic

	DNEL	Long term Inhalation	6.81 mg/m <sup>3</sup>		Systemic

#### **PNECs**

Product/ingredient name	Compartment Detail	Value	Method Detail
1,2-benzisothiazol-3(2H)-one	Fresh water Marine water Sewage Treatment Plant	4.03 μg/l 0.403 μg/l 1.03 mg/l	- - -
	Fresh water sediment	49.9 µg/kg dwt 4.99 µg/kg dwt 3 mg/kg	- - -

8.2 Exposure controls	
Appropriate engineering controls	rovide adequate ventilation. Where reasonably practicable, this should be chieved by the use of local exhaust ventilation and good general extraction. If ese are not sufficient to maintain concentrations of particulates and solvent apours below the OEL, suitable respiratory protection must be worn.
Individual protection measu	
Hygiene measures	ash hands, forearms and face thoroughly after handling chemical products, fore eating, smoking and using the lavatory and at the end of the working period. opropriate techniques should be used to remove potentially contaminated clothing. ash contaminated clothing before reusing. Ensure that eyewash stations and afety showers are close to the workstation location.
Eye/face protection	se safety eyewear designed to protect against splash of liquids.
Skin protection	
Hand protection

# **SECTION 8: Exposure controls/personal protection**

		The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.
Body protection	:	Personnel should wear antistatic clothing made of natural fibres or of high- temperature-resistant synthetic fibres.
Other skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	:	If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators.
Environmental exposure controls	:	Do not allow to enter drains or watercourses.

## **SECTION 9: Physical and chemical properties**

ŝ

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

	• •
<u>Appearance</u>	
Physical state	: Liquid.
Colour	: Brown.
Odour	: Not available.
Odour threshold	: Not available.
Melting point/freezing point	: Technically not possible to measure
Initial boiling point and boiling range	: 100 to 100.1°C (212 to 212.2°F)
Flammability (solid, gas)	: Not available.
Upper/lower flammability or explosive limits	: Not available.
	Not available.
Flash point	: Closed cup: 80°C (176°F) [Product does not sustain combustion.]
Auto-ignition temperature	: 330°C (626°F)
Decomposition temperature	: Not applicable.
рН	: 8.1 to 8.7
Viscosity	: Dynamic: 97 mPa·s Kinematic: 92 mm²/s

#### Solubility(ies)

Media	Result	
cold water	Soluble	
Solubility in water	Not available.	
Aiscible with water	Yes.	
Partition coefficient: n-octanol/ vater	Not applicable.	
/apour pressure	1.9 kPa (14.6 mm Hg)	
Relative density	Not available.	
Density	1.055 g/cm³	
/apour density	Not available.	
Explosive properties	Not available.	
Dxidising properties	Not available.	
Weight volatiles	79.9 % (w/w)	
/OC content	1.9 % (w/w) (2010	/75/EU)

6/12

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

Permahyd® Hi-TEC Mixing Colour 480 WT 336 Translucent Red

#### 9.2 Other information

#### 9.2.1 Information with regard to physical hazard classes

Flow time (ISO 2431) : 69 s (room temperature) [Jet diameter: 4 mm] Further information Not available.

# 9.2.2 Other safety characteristicsMiscible with water: Yes.

Further information Not available.

room temperature (=20°C)

#### SECTION 10: Stability and reactivity 10.1 Reactivity : No specific test data related to reactivity available for this product or its ingredients. 10.2 Chemical stability : Stable under recommended storage and handling conditions (see Section 7). 10.3 Possibility of : Under normal conditions of storage and use, hazardous reactions will not occur. hazardous reactions 10.4 Conditions to avoid : When exposed to high temperatures may produce hazardous decomposition products. **10.5 Incompatible materials** : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. 10.6 Hazardous : Decomposition products may include the following materials: carbon monoxide, decomposition products carbon dioxide, smoke, oxides of nitrogen.

Not applicable

# **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

There are no data available on the mixture itself. The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. If splashed in the eyes, the liquid may cause irritation and reversible damage.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Contains 1,2-benzisothiazol-3(2H)-one. May produce an allergic reaction. **Acute toxicity**

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

12.6 Other adverse effects : No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

<u>Product</u>	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	: Yes.

#### Waste catalogue

Waste code	Waste designation
08 01 11*	waste paint and varnish containing organic solvents or other hazardous substances

#### Packaging

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Type of packaging	Waste catalogue		
	15 01 10*	packaging containing residues of or contaminated by hazardous substances	
Special precautions	or liners may	al and its container must be disposed of in a safe way. Empty containers y retain some product residues. Avoid dispersal of spilt material and ontact with soil, waterways, drains and sewers.	

# **SECTION 14: Transport information**
