

# SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

| 1.1 Product identifier           |   |
|----------------------------------|---|
| Product identifier               | : HG 725  |
| Product name                     | : Permasolid® HS Mixing Colour 275 BRILLIANT BLUE |
| Product type                     | : Liquid.   |
| Other means of<br>identification | : 4025331236931                                   |
| Date of issue/ Date of revision  | : 28 May 2024                                     |
| Version                          | : 1.07  |
| Date of previous issue           | : 27 May 2024                                     |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Identified uses      | Coating component.     |                 |
|----------------------|------------------------|-----------------|
| Uses advised against | Not for sale to or use | e by consumers. |

## 1.3 Details of the supplier of the safety data sheet

| Axalta Coating Systems Ger                           | many GmbH & Co. KG          |
|--|-----------------------------|
| Christbusch 25                                       |                             |
| DE 42285 Wuppertal                                   |                             |
| +49 (0)202 529-0                                     |                             |
| e-mail address of person<br>responsible for this SDS | : sds-competence@axalta.com |

## 1.4 Emergency telephone number

| <u>Supplier</u>    |                     |
|--------------------|---------------------|
| Telephone number   | : +(44)-870-8200418 |
| Hours of operation | :                   |

## **SECTION 2: Hazards identification**

## 2.1 Classification of the substance or mixture

**Product definition Classification according to UK CLP/GHS** 

Flam. Lig. 3, H226 Skin Sens. 1, H317 **STOT SE 3. H336** Aquatic Chronic 3, H412

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

: Mixture

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

# **SECTION 2: Hazards identification**

| Hazard pictograms   | : |   |
|---|---|---|
| Signal word   |   | Warning   |
| Contains  |   | n-butyl acetate<br>Reaction mass of bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate and methyl<br>1,2,2,6,6-pentamethyl-4-piperidyl sebacate<br>2,3-epoxypropyl neodecanoate<br>2-hydroxyethyl methacrylate   |
| Hazard statements   | : | H226 - Flammable liquid and vapour.<br>H317 - May cause an allergic skin reaction.<br>H336 - May cause drowsiness or dizziness.<br>H412 - Harmful to aquatic life with long lasting effects.  |
| Precautionary statements  |   |   |
| Prevention  | : | <ul> <li>P280 - Wear protective gloves.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing vapour.</li> </ul> |
| Response  | : | P304 + P312 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell.<br>P302 + P352 - IF ON SKIN: Wash with plenty of water.  |
| Storage   | : | Not applicable.   |
| Disposal  | : | Not applicable.   |
| Supplemental label elements   | : | EUH066 - Repeated exposure may cause skin dryness or cracking.<br>EUH205 - Contains epoxy constituents. May produce an allergic reaction.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : | Not applicable.   |
| 2.3 Other hazards   |   |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | : | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | : | None known.   |
| The mixture may be a skin as  |   | ticar. It may also be a skin irritant and repeated contact may increase this offect   |

The mixture may be a skin sensitiser. It may also be a skin irritant and repeated contact may increase this effect.

# **SECTION 3: Composition/information on ingredients**

| Product/ingredient name       | Identifiers  | %               | Classification  | Туре    |
|-------------------------------|--|-----------------|---|---------|

|                                     |                     |      | the full text of the H |         |
|                                     |                     |      | statements declared    |         |
|                                     |                     |      | above.                 |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a physical, health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

## 4.1 Description of first aid measures

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |
|--------------|---|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If it is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. If not breathing, if breathing is irregular<br>or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give mouth-to-mouth<br>resuscitation. Get medical attention. If necessary, call a poison center or physician.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. In case of inhalation of decomposition products in a fire, symptoms may<br>be delayed. The exposed person may need to be kept under medical surveillance<br>for 48 hours. |
| Skin contact | : Wash skin thoroughly with soap and water or use recognised skin cleanser.<br>Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly<br>with water before removing it, or wear gloves. Continue to rinse for at least 10<br>minutes. Get medical attention. In the event of any complaints or symptoms, avoid<br>further exposure. Wash clothing before reuse. Clean shoes thoroughly before<br>reuse.  |

| Ingestion                  | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention. If necessary, call a poison center or physician. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |
|----------------------------|---|
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.   |

## 4.2 Most important symptoms and effects, both acute and delayed

| Over-exposure signs/sympto | oms   |
|----------------------------|---|
| Eye contact                | : No specific data.   |
| Inhalation                 | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion                  | : No specific data.   |

## 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
|---------------------|--|
| Specific treatments | : No specific treatment.   |

# SECTION 5: Firefighting measures

| :   | Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray.  |  |  |  |  |
|-----|---|--|--|--|--|
| :   | Do not use water jet.   |  |  |  |  |
| rom | the substance or mixture  |  |  |  |  |
| :   | Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.                      |  |  |  |  |
| :   | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen. |  |  |  |  |
|     |   |  |  |  |  |
| :   | Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.           |  |  |  |  |
| :   | Appropriate breathing apparatus may be required.  |  |  |  |  |
|     | :<br>rom<br>:<br>:  |  |  |  |  |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | ote | ctive equipment and emergency procedures  |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | :   | Exclude sources of ignition and ventilate the area. Avoid breathing vapour or mist.<br>Refer to protective measures listed in sections 7 and 8.   |
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". |
| 6.2 Environmental precautions  | :   | Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.                              |

## 6.3 Methods and material for containment and cleaning up

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Preferably clean with a detergent. Avoid using solvents.

| 6.4 Reference to other | : See Section 1 for emergency contact information.                          |
|------------------------|---|
| sections               | See Section 8 for information on appropriate personal protective equipment. |
|                        | See Section 13 for additional waste treatment information.                  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 7.1 Precautions for safe handling

Prevent the creation of flammable or explosive concentrations of vapours in air and avoid vapour concentrations higher than the occupational exposure limits.

In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard.

Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. Operators should wear antistatic footwear and clothing and floors should be of the conducting type.

Keep away from heat, sparks and flame. No sparking tools should be used.

Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.

Put on appropriate personal protective equipment (see Section 8).

Never use pressure to empty. Container is not a pressure vessel.

Always keep in containers made from the same material as the original one.

Comply with the health and safety at work laws.

Do not allow to enter drains or watercourses.

## Information on fire and explosion protection

Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations.

## Notes on joint storage

Keep away from: oxidising agents, strong alkalis, strong acids.

## Additional information on storage conditions

Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away from heat and direct sunlight. Keep away from sources of ignition. No smoking. Prevent unauthorised access. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

## Seveso Directive - Reporting thresholds

#### Danger criteria

|     | Notification and MAPP threshold | Safety report threshold |
|-----|---------------------------------|-------------------------|
| P5c | 5000 tonne                      | 50000 tonne             |

# **SECTION 7: Handling and storage**

# 7.3 Specific end use(s)

| Recommendations            | : Not available. |
|----------------------------|------------------|
| Industrial sector specific | : Not available. |
| solutions                  |                  |

## **SECTION 8: Exposure controls/personal protection**

## 8.1 Control parameters

## **Occupational exposure limits**

| Product/ingredient name | Exposure limit values  |
|-------------------------|--|
| n-butyl acetate         | EH40/2005 WELs (United Kingdom (UK), 1/2020).<br>STEL: 966 mg/m <sup>3</sup> 15 minutes.<br>STEL: 200 ppm 15 minutes.<br>TWA: 724 mg/m <sup>3</sup> 8 hours. |
| heptan-2-one            | TWA: 150 ppm 8 hours.<br>EH40/2005 WELs (United Kingdom (UK), 1/2020). Absorbed<br>through skin.   |
|                         | STEL: 475 mg/m <sup>3</sup> 15 minutes.<br>STEL: 100 ppm 15 minutes.<br>TWA: 237 mg/m <sup>3</sup> 8 hours.<br>TWA: 50 ppm 8 hours.                          |

## **Biological exposure indices**

No exposure indices known.

| Recommended monitoring | : | Reference should be made to appropriate monitoring standards. Reference to |
|------------------------|---|--|
| procedures             |   | national guidance documents for methods for the determination of hazardous |
|                        |   | substances will also be required.  |

## **DNELs/DMELs**

| Product/ingredient name     | Туре | Exposure                 | Value                  | Population         | Effects  |

|   | Soil                      | 0.476 mg/kg  | -             |

#### 8.2 Exposure controls

: Provide adequate ventilation. Where reasonably practicable, this should be Appropriate engineering achieved by the use of local exhaust ventilation and good general extraction. If controls these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn.

#### Individual protection measures

| Hygiene measures    | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
|---------------------|---|
| Eye/face protection | : Use safety eyewear designed to protect against splash of liquids.   |

#### Eye/face protection

## Skin protection

## Hand protection

There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.

The breakthrough time must be greater than the end use time of the product.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

Gloves should be replaced regularly and if there is any sign of damage to the glove material.

Always ensure that gloves are free from defects and that they are stored and used correctly.

The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.

Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

Gloves : Duration / breakthrough time: <1 hour,

Glove material: NBR, nitrile rubber, material thickness as splash protection: at least 0.2 mm, (EN374)

Glove material: NBR, nitrile rubber Material thickness for short-term contact: at least 0.5 mm, (EN374)

The recommendation for the type or types of glove to use when handling this product is based on information from the following source: Expert judgment

| Date of issue/Date of revision | : 5/28/2024 | Date of previous issue | : 5/27/2024 | Version : 1.07 8/1 |
|--------------------------------|-------------|------------------------|-------------|--------------------|

# **SECTION 8: Exposure controls/personal protection**

| Environmental exposure<br>controls | : Do not allow to enter drains or watercourses.   |
|------------------------------------|---|
|                                    | Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust<br>and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If<br>exposure cannot be avoided by the provision of local exhaust ventilation, suitable<br>respiratory protective equipment should be used. |
| Respiratory protection             | : If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators.  |
| Other skin protection              | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Body protection                    | <ul> <li>Personnel should wear antistatic clothing made of natural fibres or of high-<br/>temperature-resistant synthetic fibres.</li> </ul>  |
|                                    | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.   |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

## 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                               |  |

room temperature (=20°C)

| SECTION 10: Stability and reactivity       |  |  |  |  |
|--|--|--|--|--|
| 10.1 Reactivity                            | : No specific test data related to reactivity available for this product or its ingredients.                                     |  |  |  |
| 10.2 Chemical stability                    | : Stable under recommended storage and handling conditions (see Section 7).  |  |  |  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |  |  |  |
| 10.4 Conditions to avoid                   | : When exposed to high temperatures may produce hazardous decomposition products.  |  |  |  |
| 10.5 Incompatible materials                | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |  |  |  |
| 10.6 Hazardous<br>decomposition products   | : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.        |  |  |  |
|  | Not applicable   |  |  |  |

# **SECTION 11: Toxicological information**

## 11.1 Information on toxicological effects

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Based on the properties of the epoxy constituent(s) and considering toxicological data on similar mixtures, this mixture may be a skin sensitiser and an irritant. It contains low molecular weight epoxy constituents which are

# **SECTION 11: Toxicological information**

irritating to eyes, mucous membrane and skin. Repeated skin contact may lead to irritation and to sensitisation, possibly with cross-sensitisation to other epoxies. Skin contact with the mixture and exposure to spray mist and vapour should be avoided.

Contains Reaction mass of bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate and methyl 1,2,2,6,6-pentamethyl-4-piperidyl sebacate, 2,3-epoxypropyl neodecanoate, 2-hydroxyethyl methacrylate. May produce an allergic reaction. <u>Acute toxicity</u>

Permasolid® HS Mixing Colour 275 BRILLIANT BLUE

# **SECTION 16: Other information**

PNEC = Predicted No Effect Concentration RRN = REACH Registration Number SGG = Segregation Group

#### vPvB = Very Persistent and Very Bioaccumulative

#### Procedure used to derive the classification

| Classification          | Justification         |
|-------------------------|-----------------------|
| Flam. Liq. 3, H226      | On basis of test data |
| Skin Sens. 1, H317      | Calculation method    |
| STOT SE 3, H336         | Calculation method    |
| Aquatic Chronic 3, H412 | Calculation method    |

#### Full text of abbreviated H statements

| H226   | Flammable liquid and vapour.                          |
|--------|---|
| H302   | Harmful if swallowed.                                 |
| H304   | May be fatal if swallowed and enters airways.         |
| H315   | Causes skin irritation.                               |
| H317   | May cause an allergic skin reaction.                  |
| H319   | Causes serious eye irritation.                        |
| H332   | Harmful if inhaled.                                   |
| H335   | May cause respiratory irritation.                     |
| H336   | May cause drowsiness or dizziness.                    |
| H341   | Suspected of causing genetic defects.                 |
| H361   | Suspected of damaging fertility or the unborn child.  |
| H400   | Very toxic to aquatic life.                           |
| H410   | Very toxic to aquatic life with long lasting effects. |
| H411   | Toxic to aquatic life with long lasting effects.      |
| H412   | Harmful to aquatic life with long lasting effects.    |
| EUH066 | Repeated exposure may cause skin dryness or cracking. |

## Full text of classifications

| A sector Trans. A      |   |  |
|------------------------|---|--|
| Acute Tox. 4           | ACUTE TOXICITY - Category 4                                   |  |
| Aquatic Acute 1        | SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 1                |  |
| Aquatic Chronic 1      | LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 1               |  |
| Aquatic Chronic 2      | LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2               |  |
| Aquatic Chronic 3      | LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3               |  |
| Asp. Tox. 1            | ASPIRATION HAZARD - Category 1                                |  |
| Eye Irrit. 2           | SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2                |  |
